

Programme Educational Objectives and Programme Outcomes

Sl. No.	Programme Educational Objectives (PEOs)	Programme Outcomes (POs)
		On Completion of the programme Graduands will be able to:
1	To provide students with the strong foundation knowledge and to engage them in lifelong learning and self-education.	Applying engineering knowledge: An ability to apply knowledge of computing and mathematics appropriate to the discipline.
2	To encourage teamwork, technical writing oral communication skills and professional development.	Identification and analysis of problem: An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution.
3	To prepare graduates who will be successful professionals in industry, government, academia, research.	Design/implementation of solutions: To design, implement and evaluate a computer based process or program to meet the desired requirements.
4	To develop an ability to analyze the requirements of the software, understand the technical specifications, design and provide solutions for a product designs.	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5	To prepare the students for a successful career and work with values & social concern.	Resource and tool usage: Selection and application of appropriate techniques, resources, and IT tools
6		The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

Sl. No.	Programme Educational Objectives (PEOs)	Programme Outcomes (POs)
		On Completion of the programme Graduands will be able to:
7		Environment and sustainability: An ability to analyze the local and global impact of computing on individuals, organizations, and society.
8		Team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings
9		Communication: Write effective reports and design documentation, make effective presentations to effectively communicate with wide range of audience.
10		Project management and finance: Apply the engineering and management principles to one's own work, as a member and leader in a team, to manage projects.
11		Life-long learning: An ability to engage in lifelong learning in the context of technological change.

PROGRAM SPECIFIC OUTCOMES

Sl.No.	Programme Specific Outcomes
1	Students will have a foundation of computer systems. Students can assess the hardware and software aspects of computer systems.
2	Students will have a foundation of software development. Students will have the ability to design, develop, test and maintain application software that satisfies the customer requirements.
3	Applications of Computing and Research Ability: Ability to use knowledge in various domains to provide solution to new ideas and innovations
