

Describe/Explain the performance of the institution in one area distinctive to its vision, priority and thrust

Vision & Mission of the Institute

Vision

The vision articulated for the College is to become and be perceived as the leading self-financing engineering college in the state and one of the prominent engineering institutions in our country.

Mission

To provide a premier educational experience for our students and a world-class environment for our faculty that supports and prepares them for addressing the engineering challenges and opportunities that exist and await them in the 21st century.

To ensure that all our students excel academically as well as prepare themselves for the future and to develop as many job creators as possible.

Innovation And Entrepreneurship Development Centre:

IEDC-SVNCE Department of industry and commerce by Government of Kerala accorded sanction to the Entrepreneurship Development Club(ED club) of SVNCE starting from 29th September 2016. Mr. Sri.Mohammed Kunju Manager, Distric Industry Centre ,Alappuzha , has inaugurated ED club in our campus on 2016. Our two teams were selected for district level YIP 2019 ideathon.

(i) ZORA PHONES.

It is an innovative device which would help the senior citizens to communicate with the external world, when they are in any kind of distress or in need of emotional support. It is designed in such a way that it can be used by the people who have poor vision and those who are categorized as legally blind. This is easy to use and learn by the old aged.

(i) Artificial exoskeleton

About artificial exoskeleton: Artificial exoskeleton is controlled by a powerful nano computer like raspberry Pi. This nano computer is coded using python it processes the information and sends that information to the required servos which will work as the information that it gets. This Artificial Exoskeleton is for paralyzed, rickets affected and the people who cannot walk or stand on their own.

Hackathon by KSUM on Womens day 2020

Mark-1: Mark1 is an artificial exoskeleton which is controlled by a powerful nano computer like raspberry Pi. This nano computer is coded using python it processes the information and sends that information to the required servos which will work as the information that it gets. To utilise maximum man power for the country and to bring a smile on the face of the people who were not able to stand or walk on their own. And to help the women's at the pregnancy stage as an energiser and a personal assistant or a companion which will take care of their health.
